

Job Title: Quality Control Manager

Location: Fort Irwin National Training Center – California

Job Type: Full-Time, On-Site

About the Role

We are seeking an experienced **Quality Control (QC) Manager** to lead and implement the Quality Control program for a **dedicated federal construction project**. This position offers a unique opportunity to demonstrate leadership, establish best practices, and scale quality oversight enterprise wide.

The QC Manager will be responsible for all aspects of quality assurance and control on the assigned project—ensuring full compliance with applicable standards, contract requirements, and client expectations—with a clear pathway to expanding influence across future projects nationwide.

Key Responsibilities

- Serve as the designated Quality Control Manager on federal and commercial construction projects, in an on-site capacity, reporting to Fort Irwin California.
- Develop and implement project-specific QC Plans in accordance with industry standards.
- Proactive identification of deficiencies and propose corrective measures consistent with the contract documents.
- Conduct Three-Phase Quality Control meetings and inspections.
- Coordinate with project teams, subcontractors, and government representatives to ensure timely resolution of deficiencies.
- Maintain accurate and organized quality control documentation including daily reports, inspection logs, submittals, and testing results.
- Ensure all materials and workmanship meet the requirements of the contract documents, applicable building codes, and local regulations. Provide training and mentoring to site personnel on quality standards and procedures.
- Support safety, commissioning, and closeout activities as required.
- Ability to successfully adapt to variable personalities and clients

Qualifications

- Minimum 5 years of experience in construction quality control, preferably on federal, military, or civil infrastructure projects.
- Experience with USACE/DPW preferred.
- CQM-C certification (Construction Quality Management for Contractors) required or must be obtained within 30 days of hire.
- Strong understanding of construction plans, specifications, submittals, and testing procedures.
- Excellent communication and organizational skills.
- Proficiency with Procore or similar construction management platforms is a plus.
- Familiar and experienced with Microsoft Office Programs and electronic file structures

Why Work With Us

You'll be joining a family of companies that are mission-focused, veteran-friendly, and deeply invested in building exceptional infrastructure across the country. We support innovative projects in energy, defense, transportation, and public infrastructure with a commitment to integrity, excellence, and community impact.

We offer a competitive compensation package in addition to the following benefits:

- Group Health Plan
- Dental Plan
